Cover: 100 Mega-parsec string of galaxies baffles cosmologists unable to find enough time for them to form according to their assumptions. **Spine:** GISP2 ice core from 1827 meters depth dated insanely old. **Edge:** Petrified wood, typically assumed to be millions of years old.

When and how long did it take for the ice sheet to build up? How long does it take wood to petrify? Which theory of gravity actually agrees with the Scripture? The physical creation reveals the truth about the Almighty, but mankind chooses to believe the evolutionists' cosmological lie. Today's astrophysicist was yesterday's Babylonian astrologer.

So also, the Scripture reveals the truth about when and how long important events took. But religious mankind likewise chooses to believe the religious lie. Today's religious clerics and priests are not so much different than their secular counterparts. They, too, give no heed to what the Almighty revealed in Scripture. Neither did their ancient counterparts, called the priests of Ba'al.
