High Priest: Voioikim	
Walls nearly finished	
Nisan 1 in 458 BC is a Sabbath. Adar 30 a Friday. Ezra would not have appointed Nisan 1 this year for the rendezvous at the river Ahava.	
Ezra arrived under the High Priest Yohanan (cf. Ezra 10:6) in the reign of Artaxerxes II, which was not this year, because the HP was Yoiaikim.	
High Priest: Voioikim	
Neh. 12:10-11	
Nisan 457 BC is in the 8th year of Artaxerxes by all reckonings.	
Kilseu 20 (cf. Ezra 10:8-9) falls on Sunday, putting Sabbath within the travel period,	
During this time Ezra is ordained and anointed as a priest.

Aramaic Papyri 6, 21 Xerxes, X Artaxerxes Kisleu 18 = Thoth [7, 14, 17], Jan 2-3. Only agrees with Nisan epoch. The document was an affidavit of a Persian, and the notary (judge) was also Persian.

AP 8: Kisleu 21 = Mesore 1, yr 6 of Artaxerxes = Nov 11/12 (ss-sr), 460 BC. There is no scribal error in this document as Horn and Wood allged. The Yeb Jews simply failed to add II Adar in the spring of 460 BC. Only the Tishri reckoning shown fits the 6th year, showing once again that chronologies equating 457 to the 7th year are incorrect. The document is a gift of dowry to a young Jewess about to be married to a Jew named Uriyah. Dating by a Jewish Tishri year makes sense considering the parties are only Jews, and a gift deed for a dowry would probably use the religious calendar.

Tablet VAT 5047 astronomical dating (-453 = 454 BC.) Artaxerxes I, 11th year = 454. "Night of the 25th, a few clouds; the moon was balanced 1 cubit in front of Mars" [6/15/454]. "Night of the 26th, the moon was behind Venus." [6/16/454]. The 28th, Mercury's last appearance in the east in the end of Aquarius. (3/11/453). 1 Cubit = 1.5 to 2.0 deg. Balanced = near conjunction.

The main reason I have set down the Tishri version of Artaxerxes I is to show that chronologies equating 457 BC to the 7th year are untenable. This Judean reckoning is, in fact, not needed for any dates in this chronology.
